I am a 4th-semester student at Politeknik Negeri Cilacap with a passion for software development. I have 1 year of experience as a full-stack web developer, specializing in Node.js, Express, React, and Laravel technologies. I actively participate in programming organizations on my campus as the head of the web division. I am very interested in knowledge sharing with others the same passion as me.

EDUCATION

[Politeknik Negeri Cilacap](#) | Cilacap, Jawa Tengah.

Informatics Engineering | 2022-2025

- GPA : 3.53/4.00

- I earned an A grade in the web and database subject in semesters 2 and 3.

ORGANIZATION

[Protic](#) (programming club) | *head of web division* | 2023-2024 | Cilacap, Jawa Tengah.

- Became a mentor at study jams web basic. Learning html,css,javascript organized by protic.

- Organized the web division of Protic, focusing on web-related topics and web programming events.

[Jurusan Komputer Bisnis Learning Center](#) | *Frontend Mentor* | 2024 | Cilacap, Jawa Tengah.

- Became a mentor at frontend learning path using react js organized by jkb learning center

PROFESSIONAL EXPERIENCES

[Teaching Factory Komputer dan Bisnis](#) | 2023

Fullstack Web Developer

- Worked collaboratively with a team on the ongoing development of a Mini ERP System for Politeknik Negeri Cilacap. My responsibilities include backend development, specifically building REST APIs using Laravel and ensuring secure API authentication.

- Building landing page for registration robotic rideas competition on sept 2023 using html,css,bootstrap and scss.

- Worked collaboratively with a team to develop Sistem Pemilihan Raya Politeknik Negeri Cilacap, enabling voting for the heads of BEM and BPM. Leveraged Laravel, Livewire, and Tailwind for development throughout August 2023

PROGRAMMING PROJECTS & ACTIVITIES

- Build a Web Blog with more than 10 articles. Developed a comprehensive dashboard with role-based access control, including Google authentication via Firebase. The dashboard facilitates management of users, posts, and comments. MongoDB was employed for the database, Express for the backend, and React.js for the frontend. Implemented Redux for global state management.

- Developed an ecommerce project inclusive of a dashboard API to facilitate store and payment management. The API was utilized by a store app built with Next.js, Stripe for payments, Tailwind and shadcn for styling, and Zustand for state management.
